GitHub

Upwork

Portfolio

Summary

AI & Automation Engineer shipping production LLM and automation systems end to end: backend, data, retrieval, and the integrations that hold them together. Owns solutions from requirements and data modeling through integration, testing, and delivery.

Experience

AI & Automation Engineer, BlueBug

02/2026 — Present | Remote

- Build and maintain three internal AI and automation products in Python, FastAPI and Supabase

AI Automation Developer, Upwork (freelance)

06/2024 — Present | Remote

- Built a resumable lead pipeline covering 2,662 towns with classification, enrichment, deduplication and QA reporting

Education

B.Sc. in Computer and Information Science, Ain Shams University

2020 — 2024

Scientific Computing Graduation Project: Graduation Project — Data-Driven English Practice App: processed datasets to simulate conversation and grammar correction, applied data-driven techniques to improve accuracy and feedback, and gained experience in data preparation, model fine-tuning and result analysis.

Skills

Python Backend

- Python, FastAPI, REST APIs, Authentication, Webhooks

Automation

- Playwright, Selenium, BeautifulSoup, Google Apps Script, Data pipelines, Resumable workflows

Databases

- PostgreSQL, Supabase, SQL, SQLite, Pandas, NumPy

Ai ML

- LLM APIs, RAG, AI agents, Prompt engineering, Ollama, Whisper, LightGBM, scikit-learn, NLP, Model evaluation, Structured output

Integrations

- Amazon SP-API, eBay API, Google Workspace APIs, Green API, Telegram Bots, Solana APIs

Business Systems

- CRM platforms, Inventory & pricing systems, Role-based access control, Audit history, Operational dashboards

Other

- Git, Docker, Streamlit, React/TypeScript, Tauri, Linux

Projects

Apply Agent

Python, Supabase, Gemini, GitHub Actions, Telegram, Deno

- Built a job-search system pulling from 17 public ATS and aggregator sources, scoring each role against a structured CV with an LLM

- Secured a public webhook with a shared secret, chat allowlisting and strict payload validation, verified against the deployed endpoint
- Designed CV tailoring as constrained selection over a closed set of bullet ids, making fabricated experience structurally impossible rather than merely discouraged

Amazon ASIN & Review Intelligence Platform

Python, Playwright, Supabase, Google Sheets APIs

- Synchronised reporting across Supabase and Google Sheets so operators could work in the tool they already used

Certificates

- **Machine Learning Specialization** — DeepLearning.AI
- **Natural Language Processing with Classification and Vector Spaces** — DeepLearning.AI
- **Advanced SQL Querying** — Maven Analytics
- **Associate Data Analyst in SQL** — DataCamp

Languages

Arabic (native) English (professional)
