

Elsayed Mustafa

AI & Automation Engineer

✉ elsayed.mustafa.ibrahim@gmail.com · ☎ +20 155 985 0933 · 📍 Cairo - Egypt · 🔗 LinkedIn · 🐙 GitHub · 🚀 Upwork · 📁 Portfolio

SUMMARY

AI & Automation Engineer building LLM agents, backend services and data pipelines that run unattended in production — Python, FastAPI, Supabase, and the integrations that hold them together under real load.

EXPERIENCE

AI & Automation Engineer, BlueBug

02/2026 — Present | Remote

- Build and maintain three internal AI and automation products in Python, FastAPI and Supabase
- Built a review-intelligence system tracking ~10,000 products and reconciling 800,000 reviews against 1.1M snapshots
- Designed resumable scraping workflows with captcha/TOTP handling, account rotation and retry logic

AI Automation Developer, Upwork (freelance)

06/2024 — Present | Remote

- Delivered 6+ client platforms end to end, from first call to launch; earned Upwork Rising Talent
- Rebuilt a bilingual field-service CRM in Bahrain: migrated 17,000+ records into 17 secured tables and cut the slowest page from 5.6s to 0.56s
- Built inventory and marketplace-pricing platforms across Amazon, eBay and Shopify covering 25,000+ items
- Delivered a wholesale ops platform with multi-format supplier ingestion, GTIN validation and transaction-safe workflows, covered by 162 automated tests
- Built a resumable lead pipeline covering 2,662 towns with classification, enrichment, deduplication and QA reporting
- Worked directly with non-technical clients to turn vague requirements into shipped systems

SELECTED PROJECTS

Apply Agent

Python, Supabase, Gemini, GitHub Actions, Telegram, Deno

- Built a job-search system pulling from 17 public ATS and aggregator sources, scoring each role against a structured CV with an LLM
- Designed CV tailoring as constrained selection over a closed set of bullet ids, making fabricated experience structurally impossible rather than merely discouraged
- Secured a public webhook with a shared secret, chat allowlisting and strict payload validation, verified against the deployed endpoint

Freelancer Meeting Copilot

Python, React/TypeScript, Tauri, SQLite, Ollama, Whisper

- Built a local-first AI meeting copilot: Whisper transcription and Ollama inference run entirely on the user's machine, so no call data ever leaves the laptop
- Implemented scoped retrieval so answers come only from that client's own notes, with grounding controls that refuse to state anything unconfirmed
- Shipped it as a cross-platform desktop app with Tauri and a React/TypeScript front end

SKILLS

Backend & APIs Python, FastAPI, REST APIs, Webhooks, Authentication, PostgreSQL, Supabase, SQL

AI & LLM LLM APIs, RAG, AI agents, Prompt engineering, Structured output, Model evaluation, Ollama, Whisper

Automation & Scraping Playwright, Selenium, Google Apps Script, Resumable workflows, Data pipelines, Amazon SP-API, eBay API

Data & Platforms Pandas, NumPy, ETL, Docker, Git, Linux, Streamlit, Telegram Bots

EDUCATION

B.Sc. Computer and Information Science, Ain Shams University

2020 — 2024

Scientific Computing · Graduation project: data-driven English practice app — conversation simulation and grammar correction

CERTIFICATES

Machine Learning Specialization — DeepLearning.AI · Natural Language Processing with Classification and Vector Spaces — DeepLearning.AI · Advanced SQL Querying — Maven Analytics · Associate Data Analyst in SQL — DataCamp

LANGUAGES

Arabic (native) · English (professional)
